

Information for Icon Collection: Stock Icons 2006

www.glyphlab.com

We've created a fresh, vibrant collection of over 500 icons covering a wide range of functions and disciplines. Stock icons in a colorful style that's equally suited to Windows XP and Windows Vista as well as websites.

Categories include: Business, Commerce and Finance, Charts and Reports; Common Toolbar; Databases; Docs, Folders, and Files; Drives and Hardware; Lights and Indicators; Multimedia; Network; Search and Find; Security; Signs and Symbols; Tasks and Workflow; Telephony; Users; Windows and Views; Zoom, Pan and, Select. And remember - if the icons you need are not there, we can make them for you as part of Glyph Lab's custom design service.

Each icon comes in four sizes: 16x16, 24x24, 32x32, and 48x48. Rather than just being resized from a larger image (that never works well), instead, each is carefully optimized at each size to ensure that they are as clear at 16x16 as they are at 48x48.

Small icons are useful if you need to pack many functions into your toolbar or website. It's important to include the option to display larger icons if you want your software to be accessible by visually impaired users.

Each icon is supplied in these eight formats:

32 Bit Alpha Bmp (t): 32-bit bitmap containing an 8-bit alpha channel. The edge pixels will anti-alias with the background color when used in toolbars which support 8-bit alpha.

24 Bit Mask Bmp (m): 24-bit bitmap with transparent areas represented by a magenta (RGB 255, 0, 255) mask.

256 Color Gif with transparency (g): 256 color paletted gif with transparency.

256 Color png with transparency (p8): 256 color paletted png with transparency

32 Bit Alpha png (p): 32-bit png file with 8-bit (256 level) transparency mask. This is the most common image format used by modern toolbars.

256 Colour Icon (i8): 256 Color icon with 1-bit transparency mask

32-bit icon image (i32): 32-bit ico file

Layered Adobe Photoshop (ps): Layered Adobe Photoshop image.

The license agreement allows you to make new icons from the stock icons, and that is made very easy by the inclusion of Photoshop format image files. In these, each object element of the icon is in a separate layer which can be moved, rotated, deleted, resized, recolored, and copied between icons.

Every image is supplied in three states or modes: normal, hot and disabled. Hot is a brighter, more saturated version of the Normal icon used to provide mouse rollover feedback.

The full set costs \$199US and can be purchased securely online with immediate download (VAT at 17.5% will be added for European Union residents). Afterwards we are available to help you with any queries or questions you might have, and ensure you get the best out of your icons. If (in the unlikely event) you are not happy with the icons we will refund your purchase price if you request it within 30 days of purchase.
